MATRIMONY

Project Overview:

Create a Matrimony website with Admin and User modules. The Admin manages user registrations, approves profiles, views users' details along with package details, and oversees the system. The user module must have a detailed registration form with comprehensive personal details with an option to upload multiple profile pictures. The system must include an online payment method for package registration and renewal, and after the registration, the user must receive a 6-digit auto-generated password with Member ID. Users can search profiles using various criteria, request chats, and block users. The project aims to provide a seamless matrimony experience, fostering connections and interactions within a user-friendly platform.

General Requirements:

- The system must be mobile-responsive, providing an optimal user experience on various devices.

- The system should have modules like Admin, and User.

Registration Requirements:

- Live form validation must be implemented for sensitive fields, ensuring accurate data entry.

- Passwords must meet minimum security requirements (e.g., minimum length, special characters, numbers).

- Email addresses must be unique, and the system should display an error if the email is already registered.

- After successful registration, the user must receive a confirmation email with the randomly generated **6-digit number** as a password and can later reset the password as needed.

Login:

- The login page must have live form validation to enhance input accuracy and user experience and an option to reset their password securely through a designated function.

Admin Module:

- Receive dashboard notifications upon new user registration.

- Approve or disapprove user registrations.

- Delete user profiles if necessary.

- View the user's packages details along with registration and expiry date

- After the package duration expires, the user profile should be automatically hidden from the system until the package is successfully renewed. This ensures that only active and engaged profiles are visible, promoting a dynamic and up-to-date user experience.

Registration Form for User Must Have the Following Fields:

- Collect personal details: Name, Gender, Height.

- Job Details: Designation, Place.

- Location: District.

- Contact details: Email, Mobile Number.

- Choose Religion and Caste from the dropdown lists.

- Select Marriage Level: Newly Married or Remarriage.

- Family Information: Mother's and Father's Name, Jobs.

- Sibling Details: Name, Married/Unmarried.

- Upload a minimum of three profile pictures.

User Module:

- View user registration and deactivation dates.

- Manage user profiles: View, Edit, Print.

- View profile visitor details.

- After registration, redirect the user to the payment page.

- Display package details with 10 days validity.

- Option to Renew package after 10 days.

- Upon successful payment, show a Message like "Registration Complete, and your profile is checked and verified by the admin shortly".

- Auto-generate a 6-digit password and Member ID for the user after registration and send to the user email id.

- Search users using Member ID (ID Search).

- Users must have three options to Search for other users such as ID Search using member id, Regular search using Age range, Caste, Religion, and Marriage Level, and Advanced search using Age range, Caste, Religion, Marriage Level, Education, District, and Job.

- Option to visit a profile and request a chat with the user.

- Block user profiles if necessary.
